Office Action Summary	Application No. 10/678,379	Applicant(s) VANDERPE, DONALD R.	
	Examiner Mital B. Patel	Art Unit 3743	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Oath/Declaration

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:
Non-initialed and/or non-dated alterations have been made to the oath or declaration. See 37 CFR 1.52(c).

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Art Unit: 3743

4. Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Garrett (US 6,001,332).

5. **As to claim 1**, Garrett teaches a method of inhalation of specific gas mixtures in a human patient with exhaled gases being shunted into the ambient atmosphere to effect 50-90% or more washout of nitrogen gas from the body, body water, ischemic tissues, and mitochondria in order to allow the reuptake of oxygen into hypoxic mitochondria and restore oxidative metabolism to affected tissues following reversible vascular occlusions in a cerebrovascular accident (stroke), the administration of said gas mixture being from a suitable supply source and being implemented as quickly as possible following the vascular event, wherein the specific gas mixtures consist only as complimentary concentrations off 20-100% oxygen and 0-80% helium (**See Col. 2, lines 1-7 and lines 55-67**). Garrett teaches essentially all of the limitations except for wherein the implementation process continues for a minimum of 30 minutes up to 72 hours. However, it would have been obvious to one of ordinary skill in the art at the time of the invention that implementation time would vary according to the individual (infant, child, adult) along with the severity of the vascular event and such a timed implementation would be obvious to the medical personnel administering the gas.

6. **As to claim 2**, Garrett teaches a method wherein the vascular event to be treated is myocardial infarction.
